

dragon fly

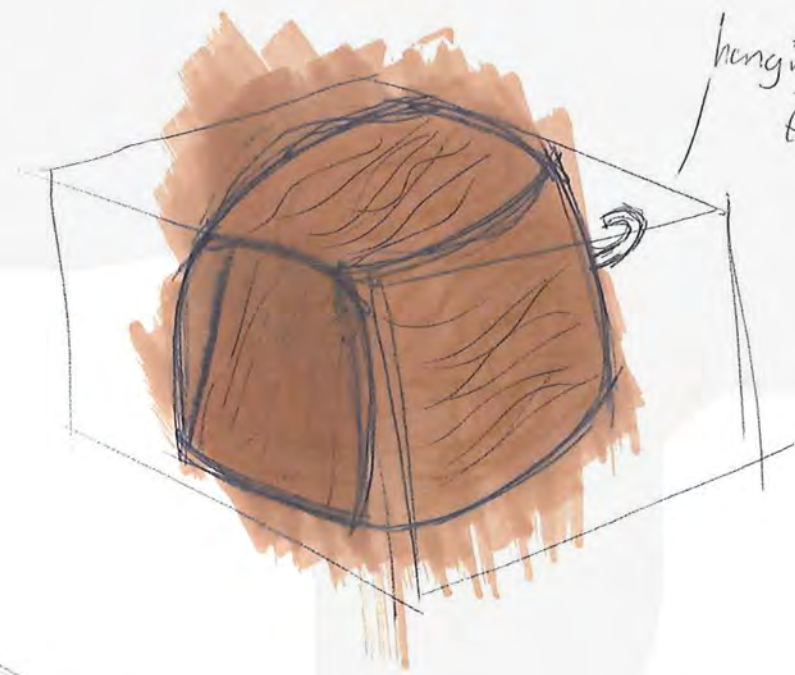

the passive catching device for children

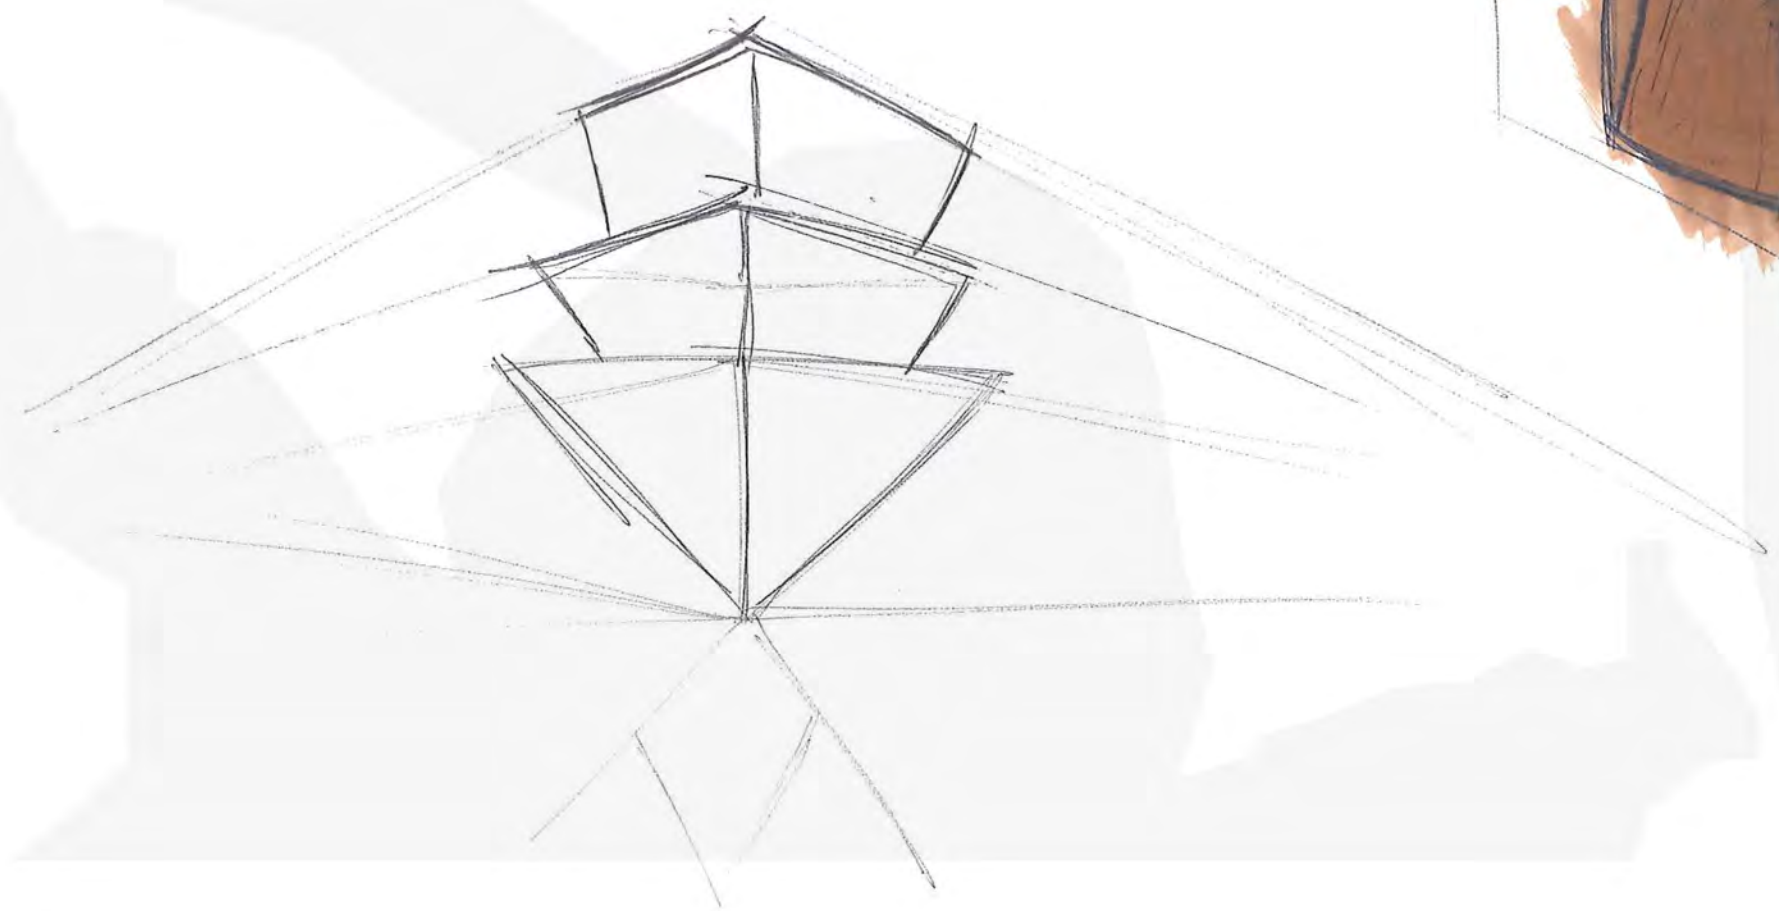

One way traps

hanging from tree branches

Needs
~~Needs~~ to be disguised

Fine mesh to hold p food.

twist to close

How to lure animal
in, food at bottom?
top?

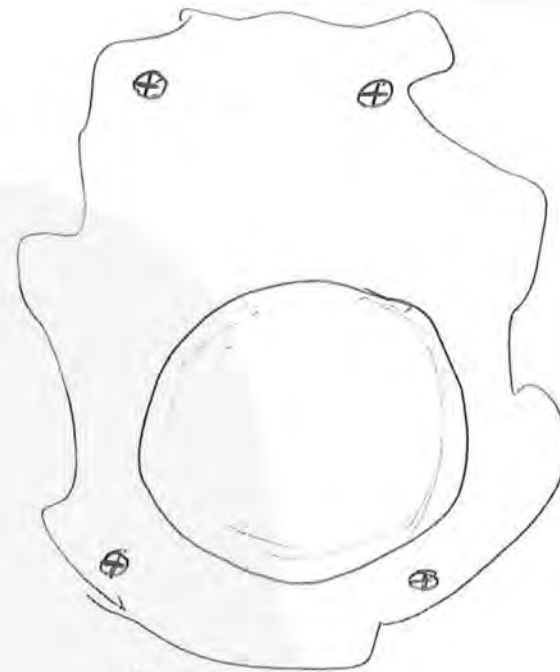

Hidden in a rock

hidden inside
a rock

Food source
attracts
insect

Bottom view

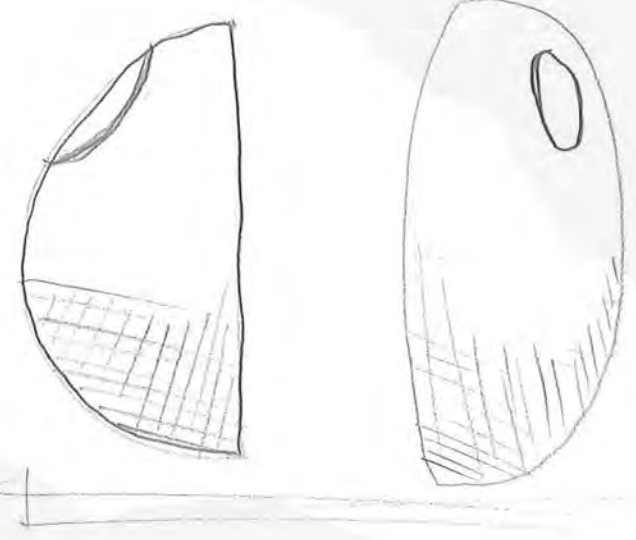

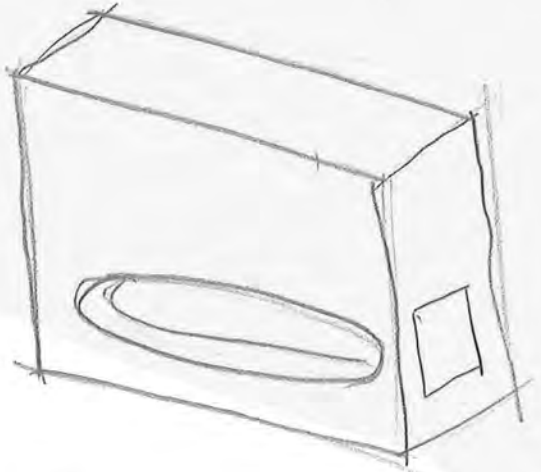

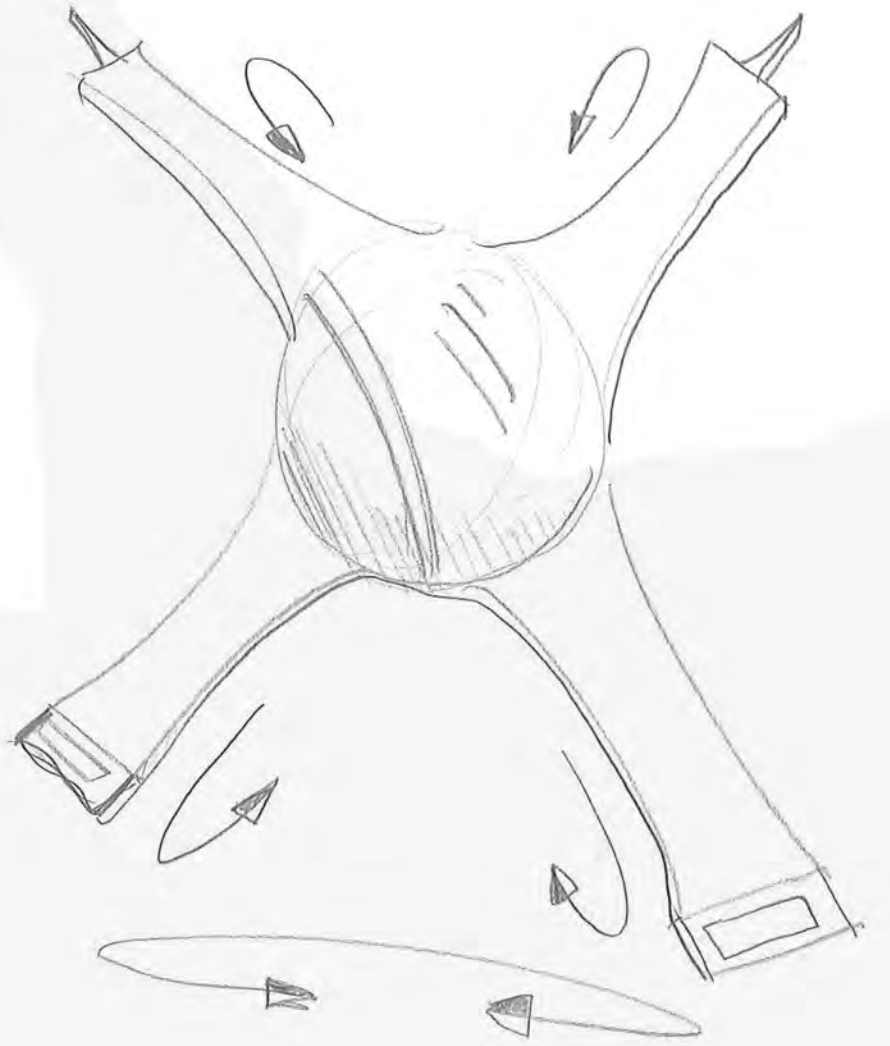

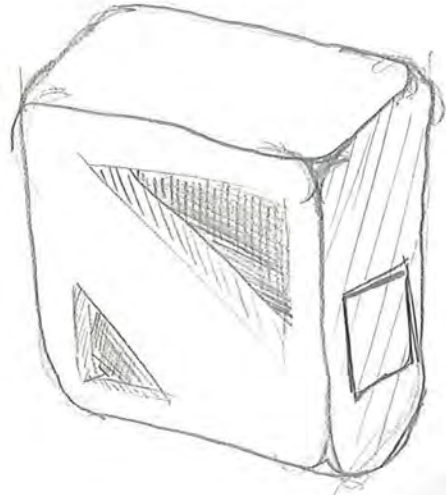

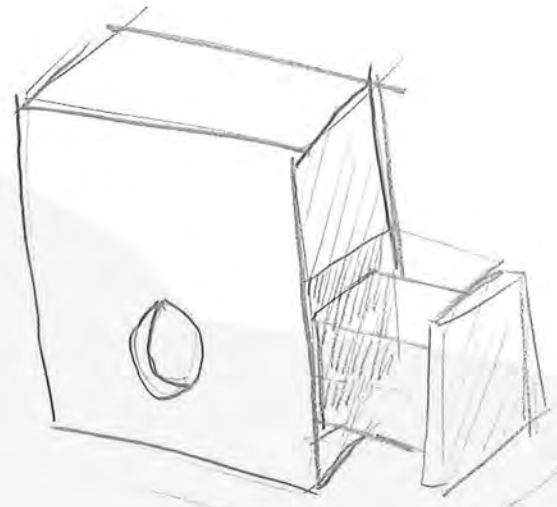

Push to eject

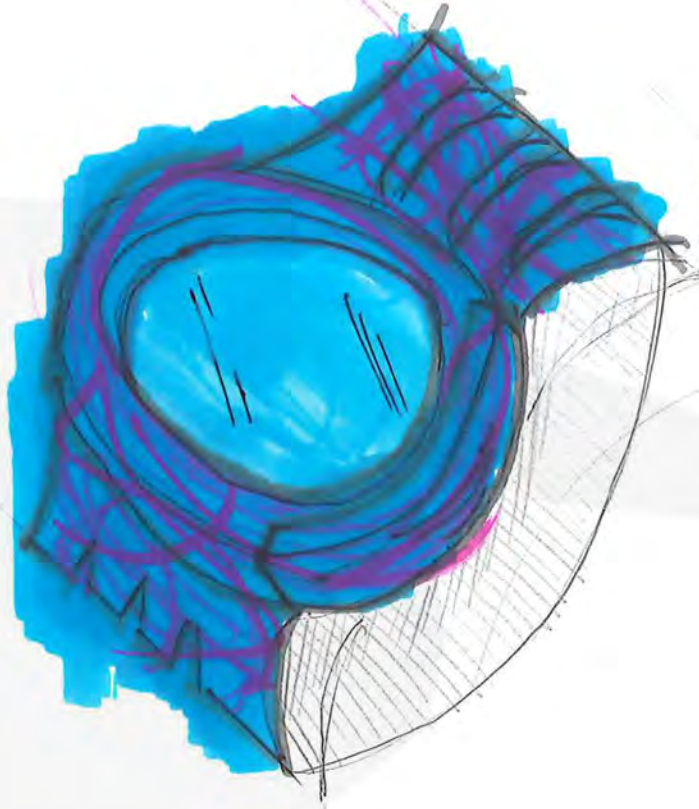

top view

Blends into
rocky areas

Tree Box

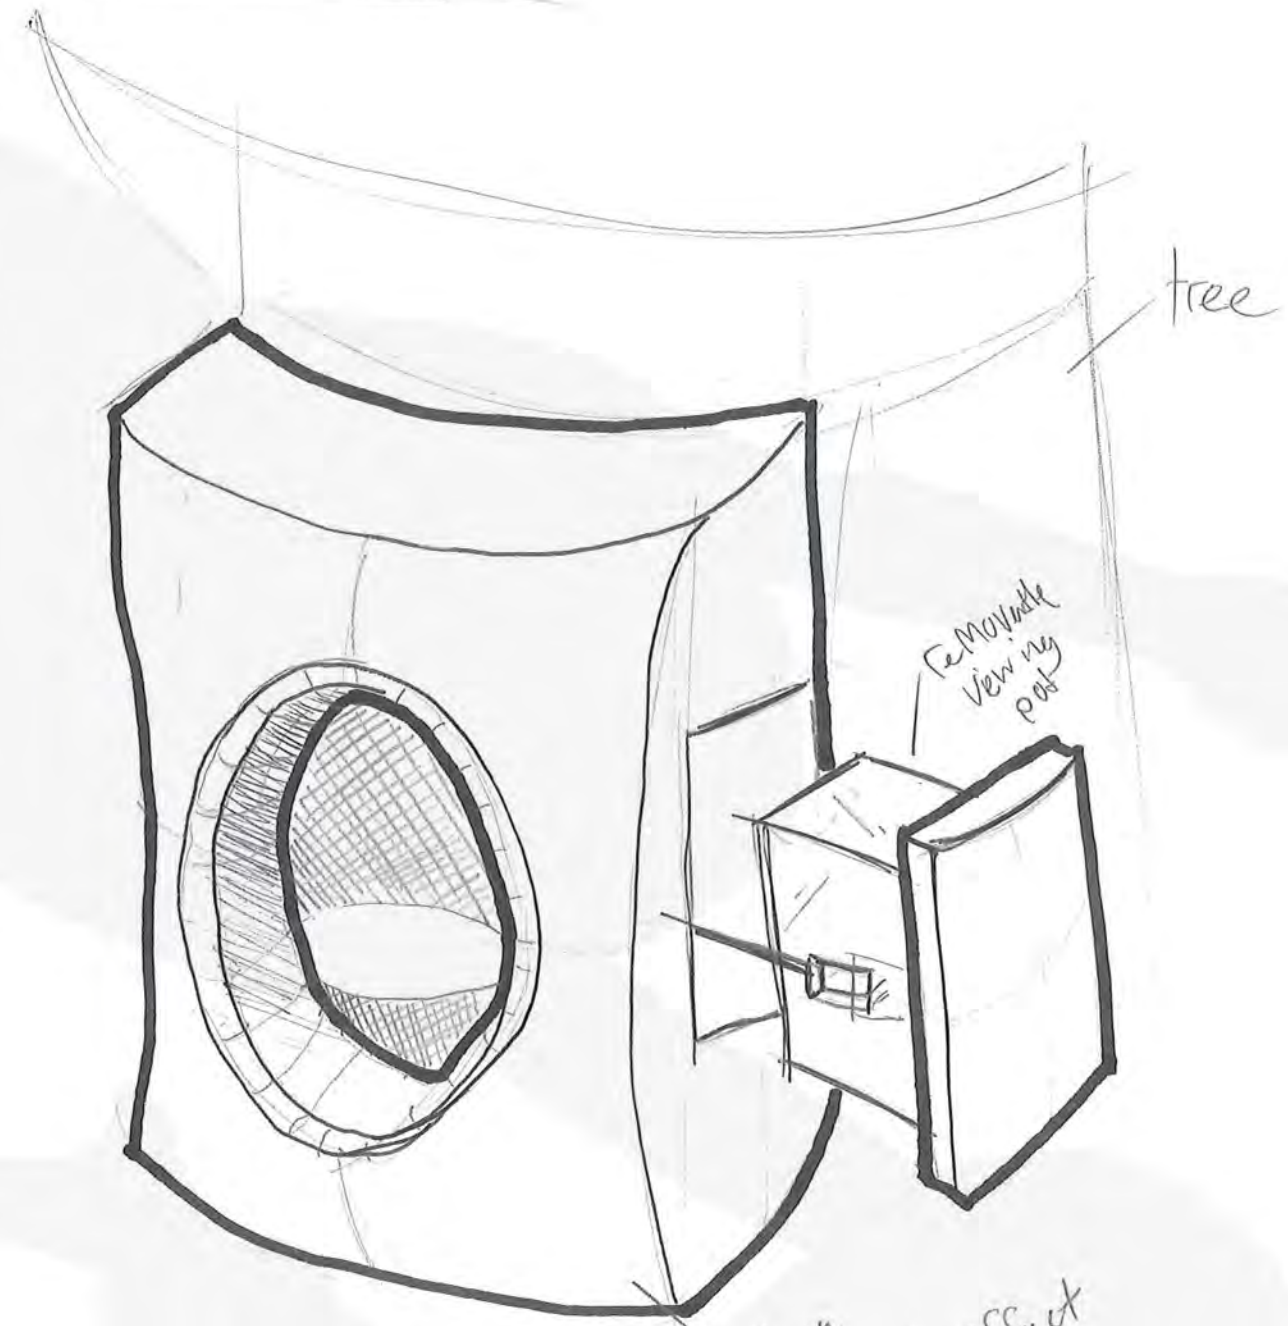

top layers removable

fly paper inside catches insects

telescopic viewing pod

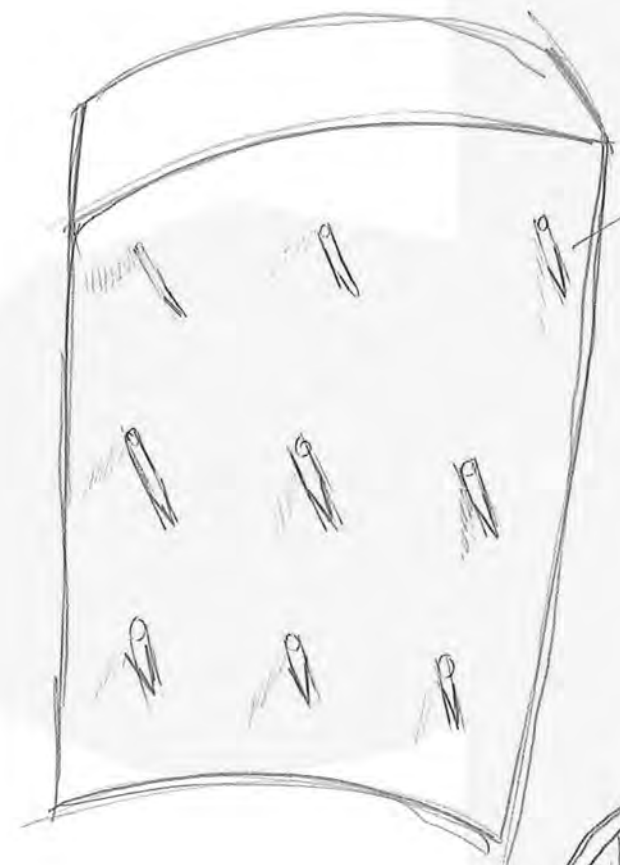

Hidden in a tree

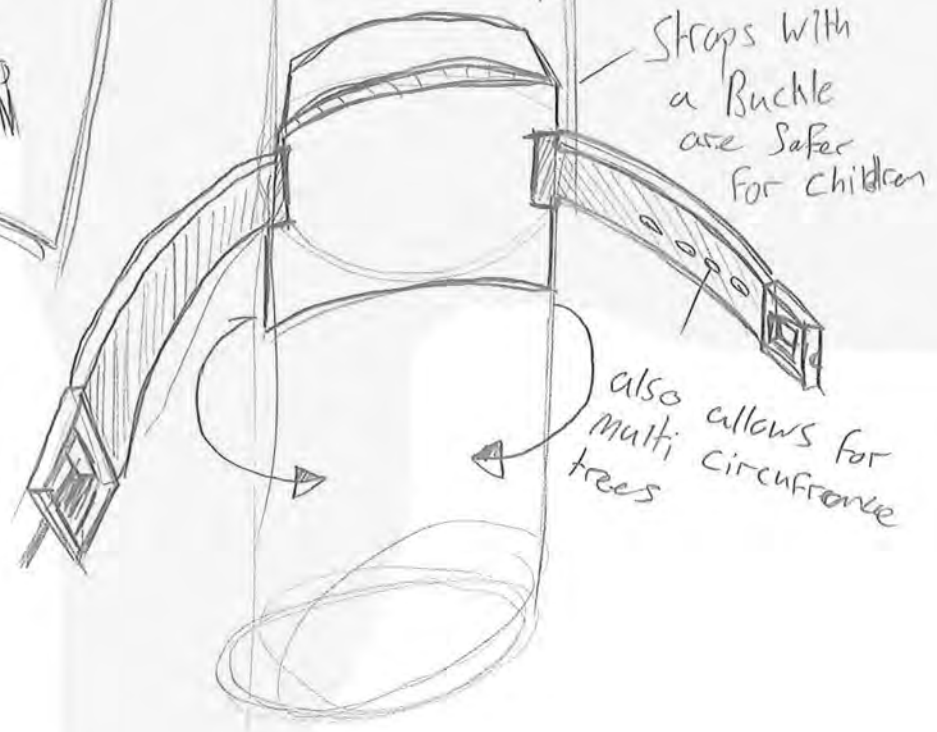

Removable view my pot

will have wood/Bark effect to blend into trees

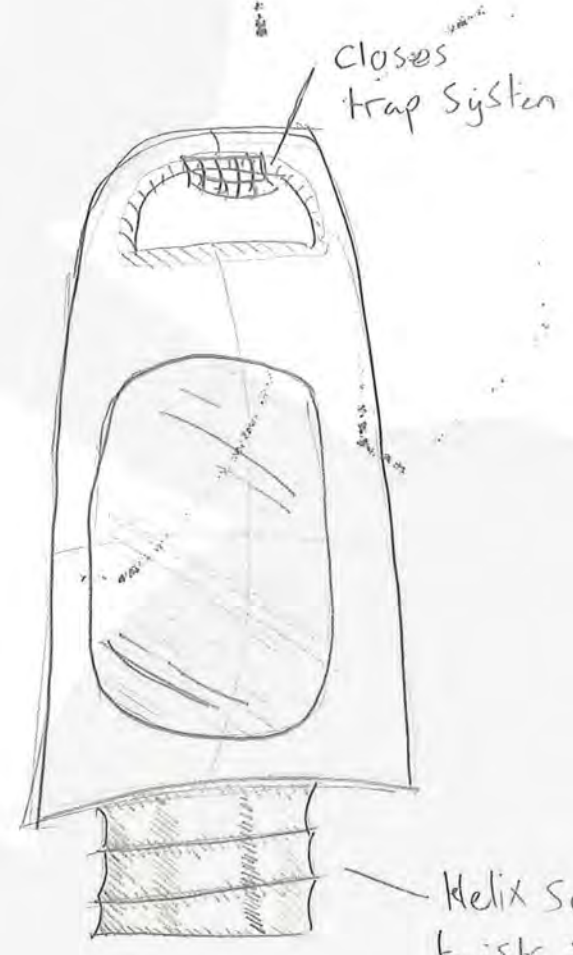

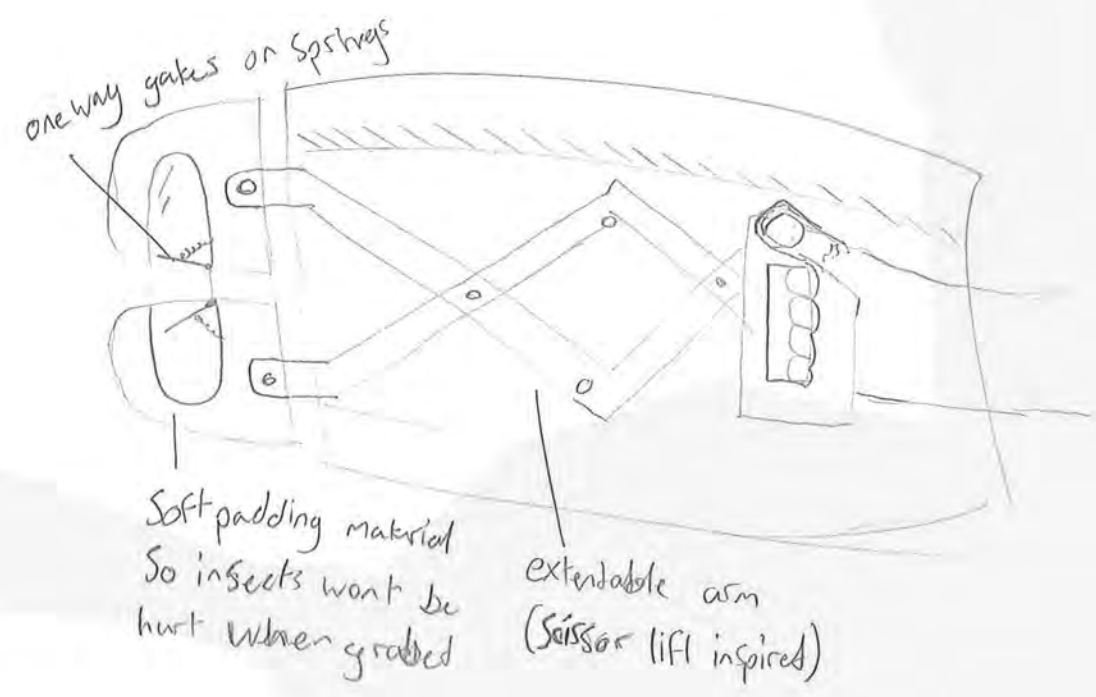

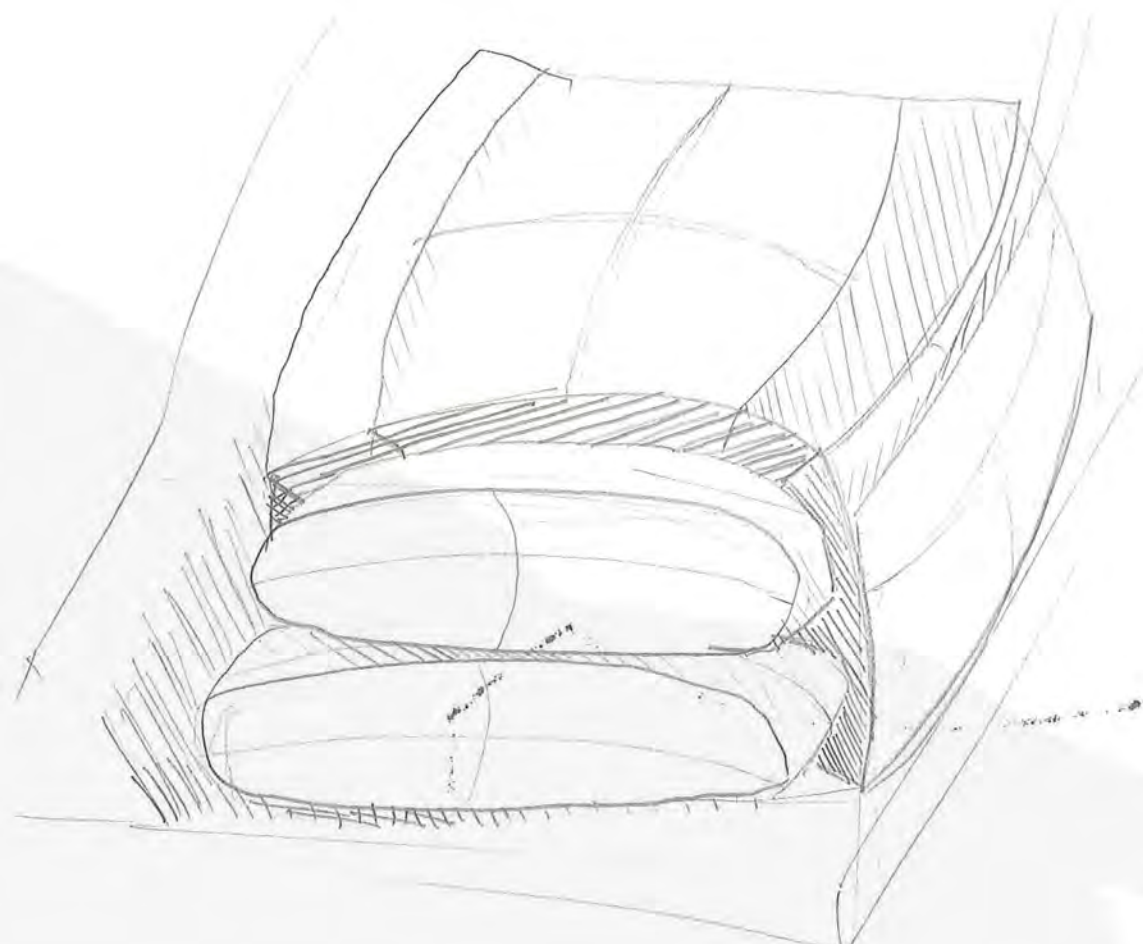

Spikes to grip into tree trunk

possible risk with child use

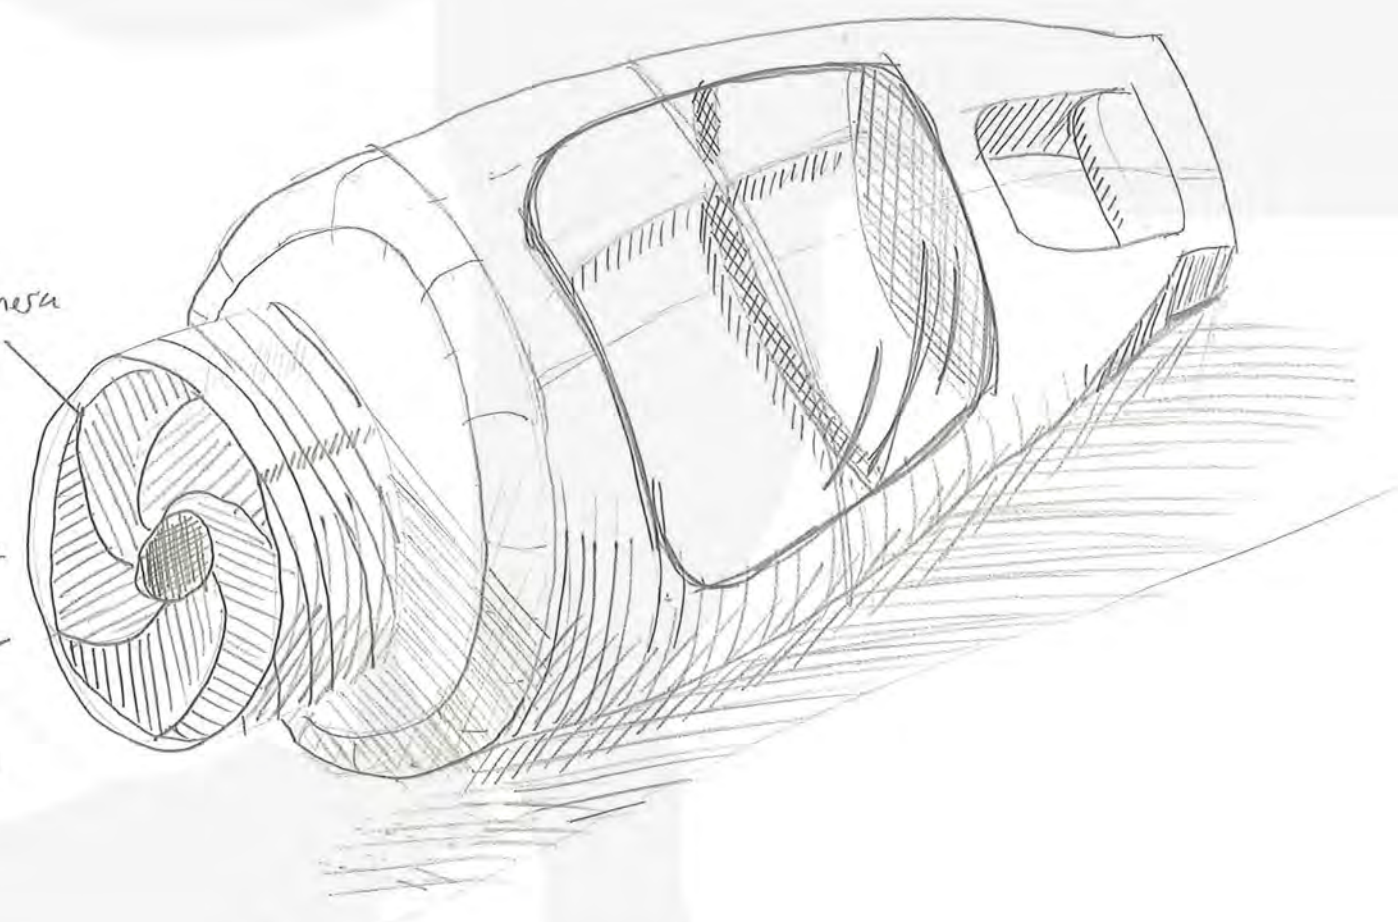

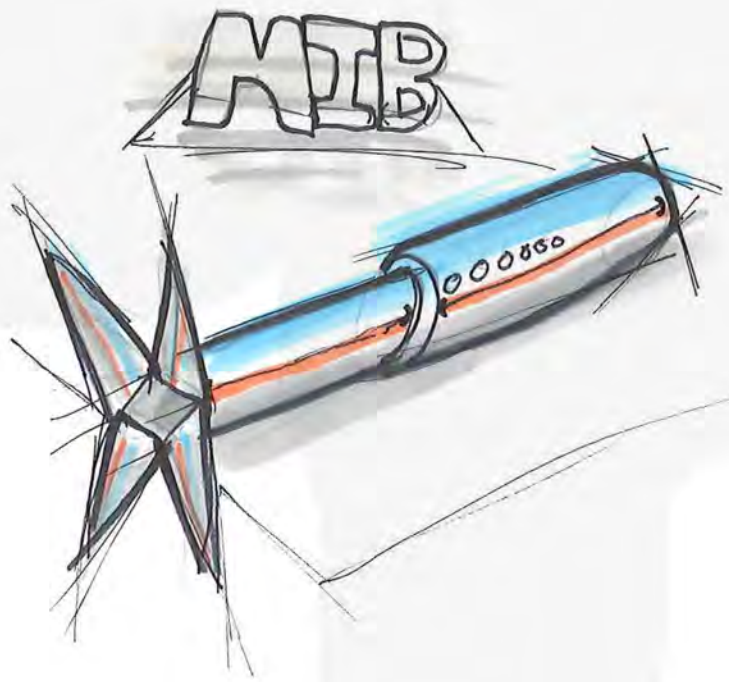

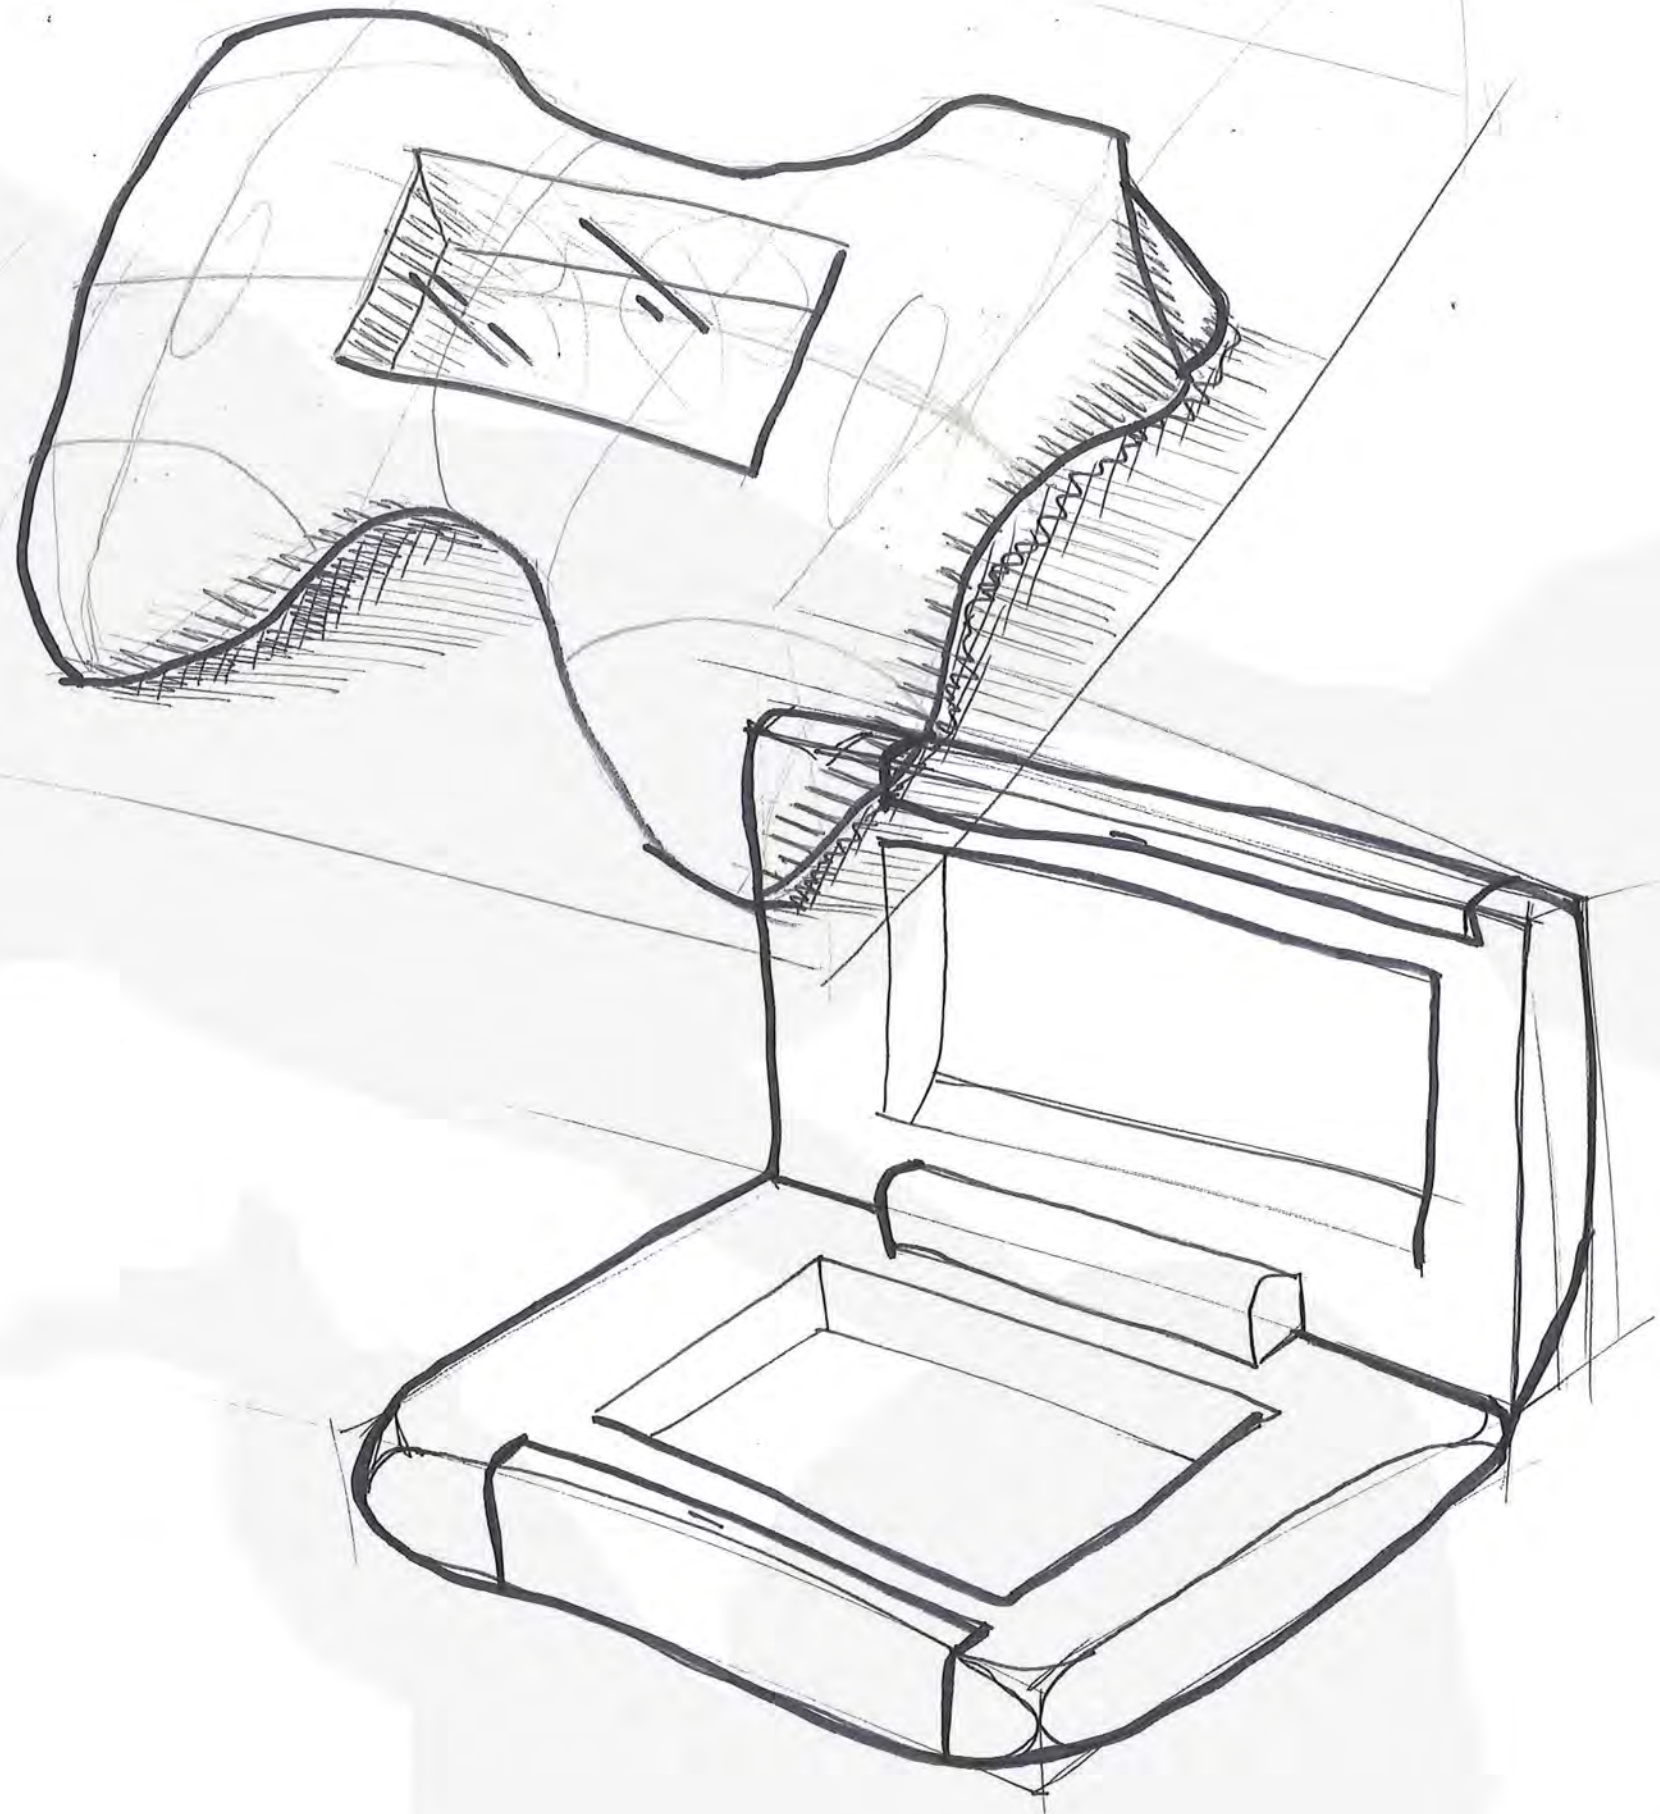

Straps with a Buckle are safer for children

also allows for multi circumference trees

Camera
inspired
Shutter
possibly
made from
a net so it
can fold

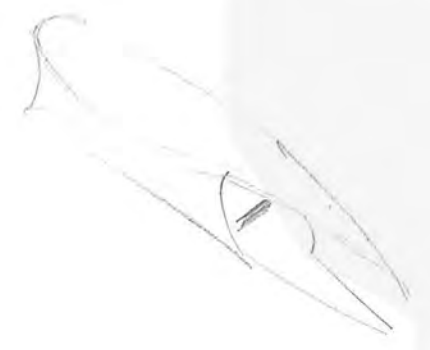

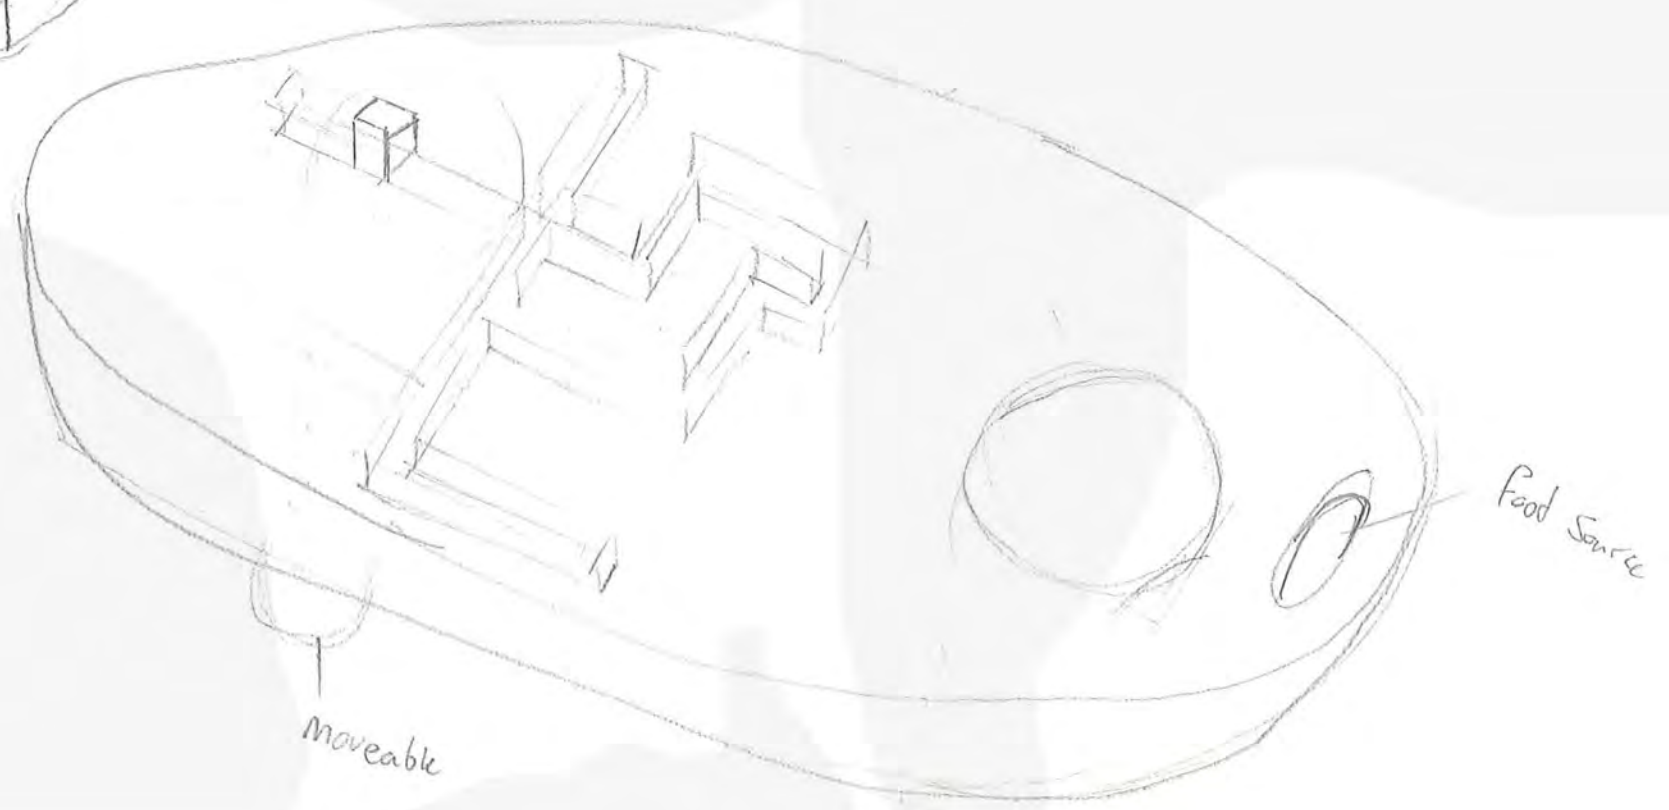

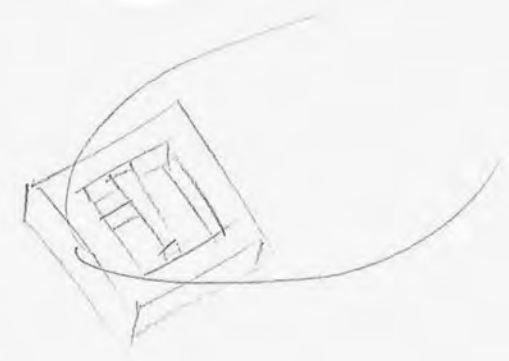

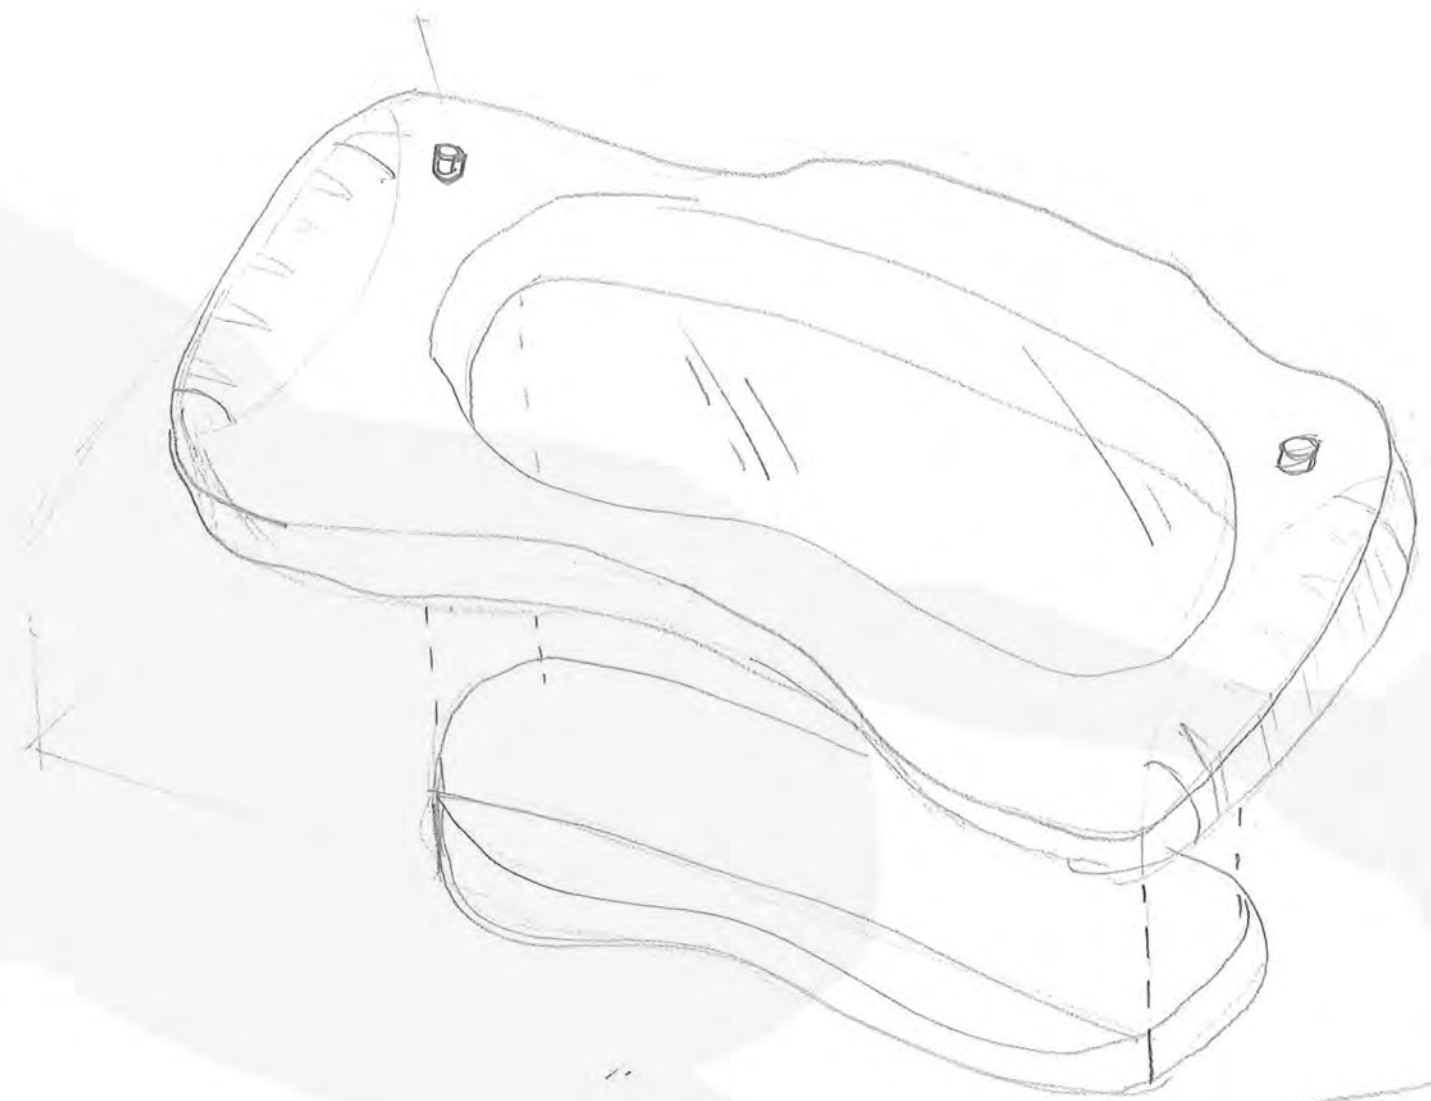

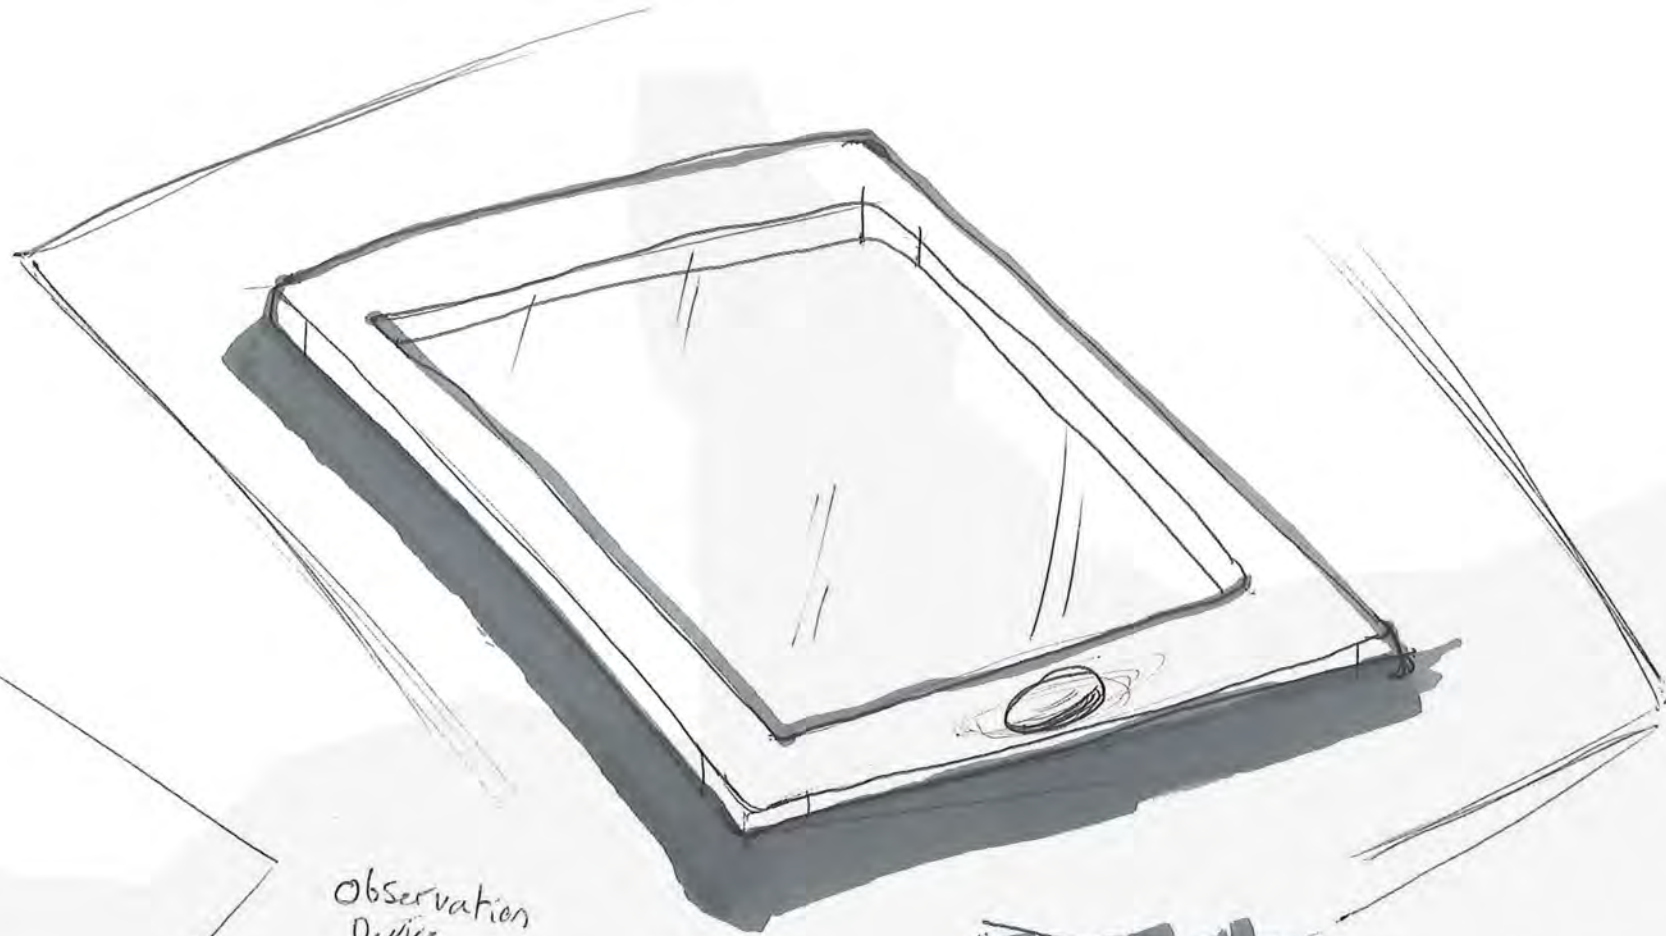

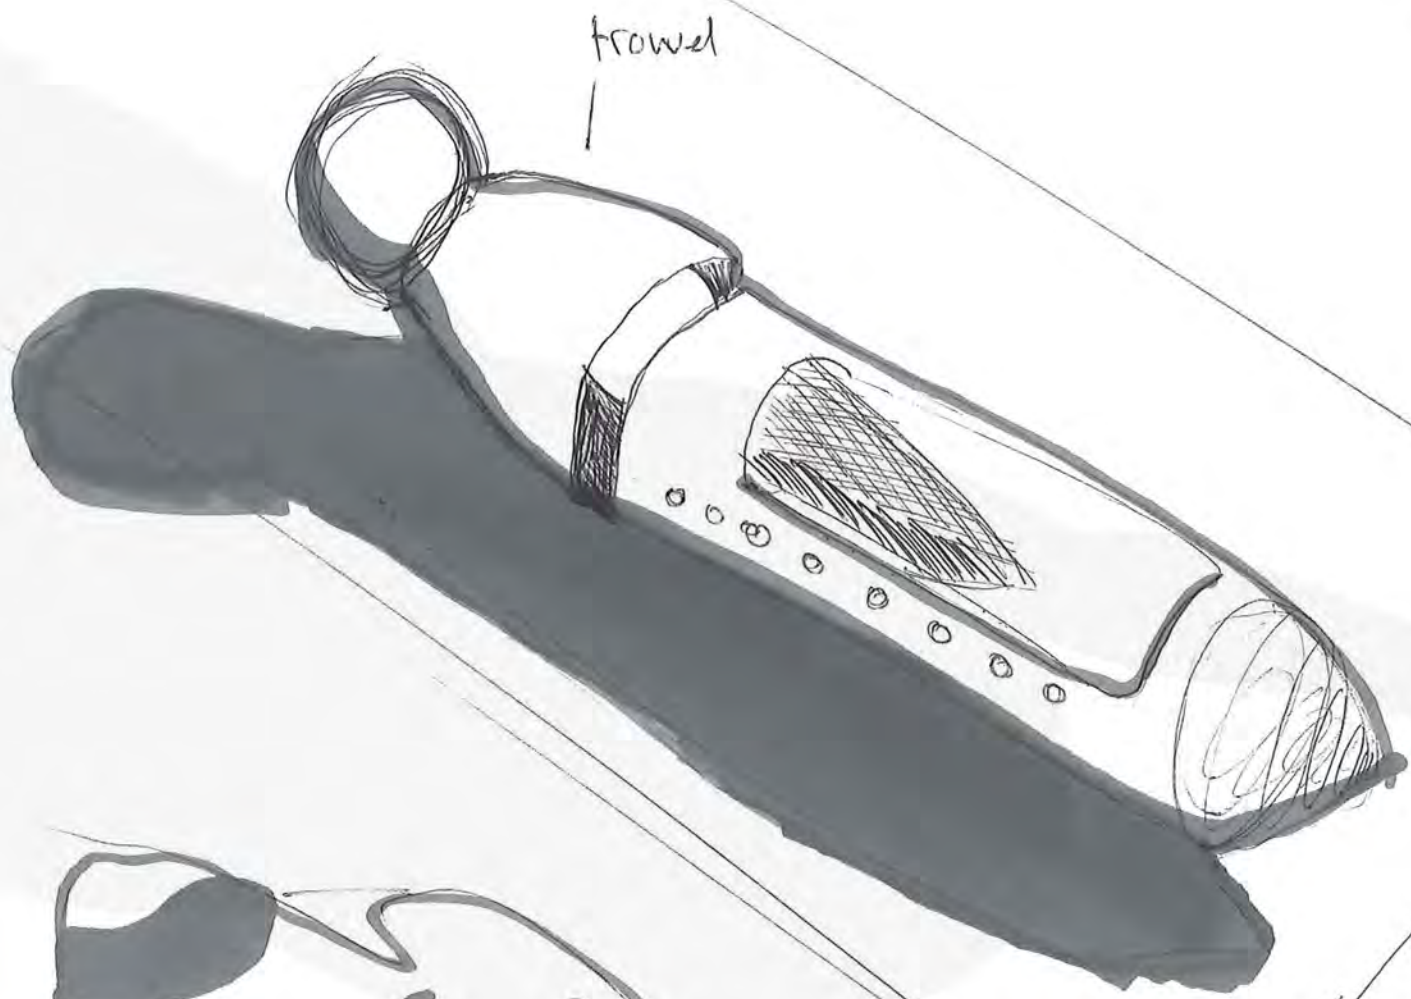

ground Box

Cluster of
Rocks

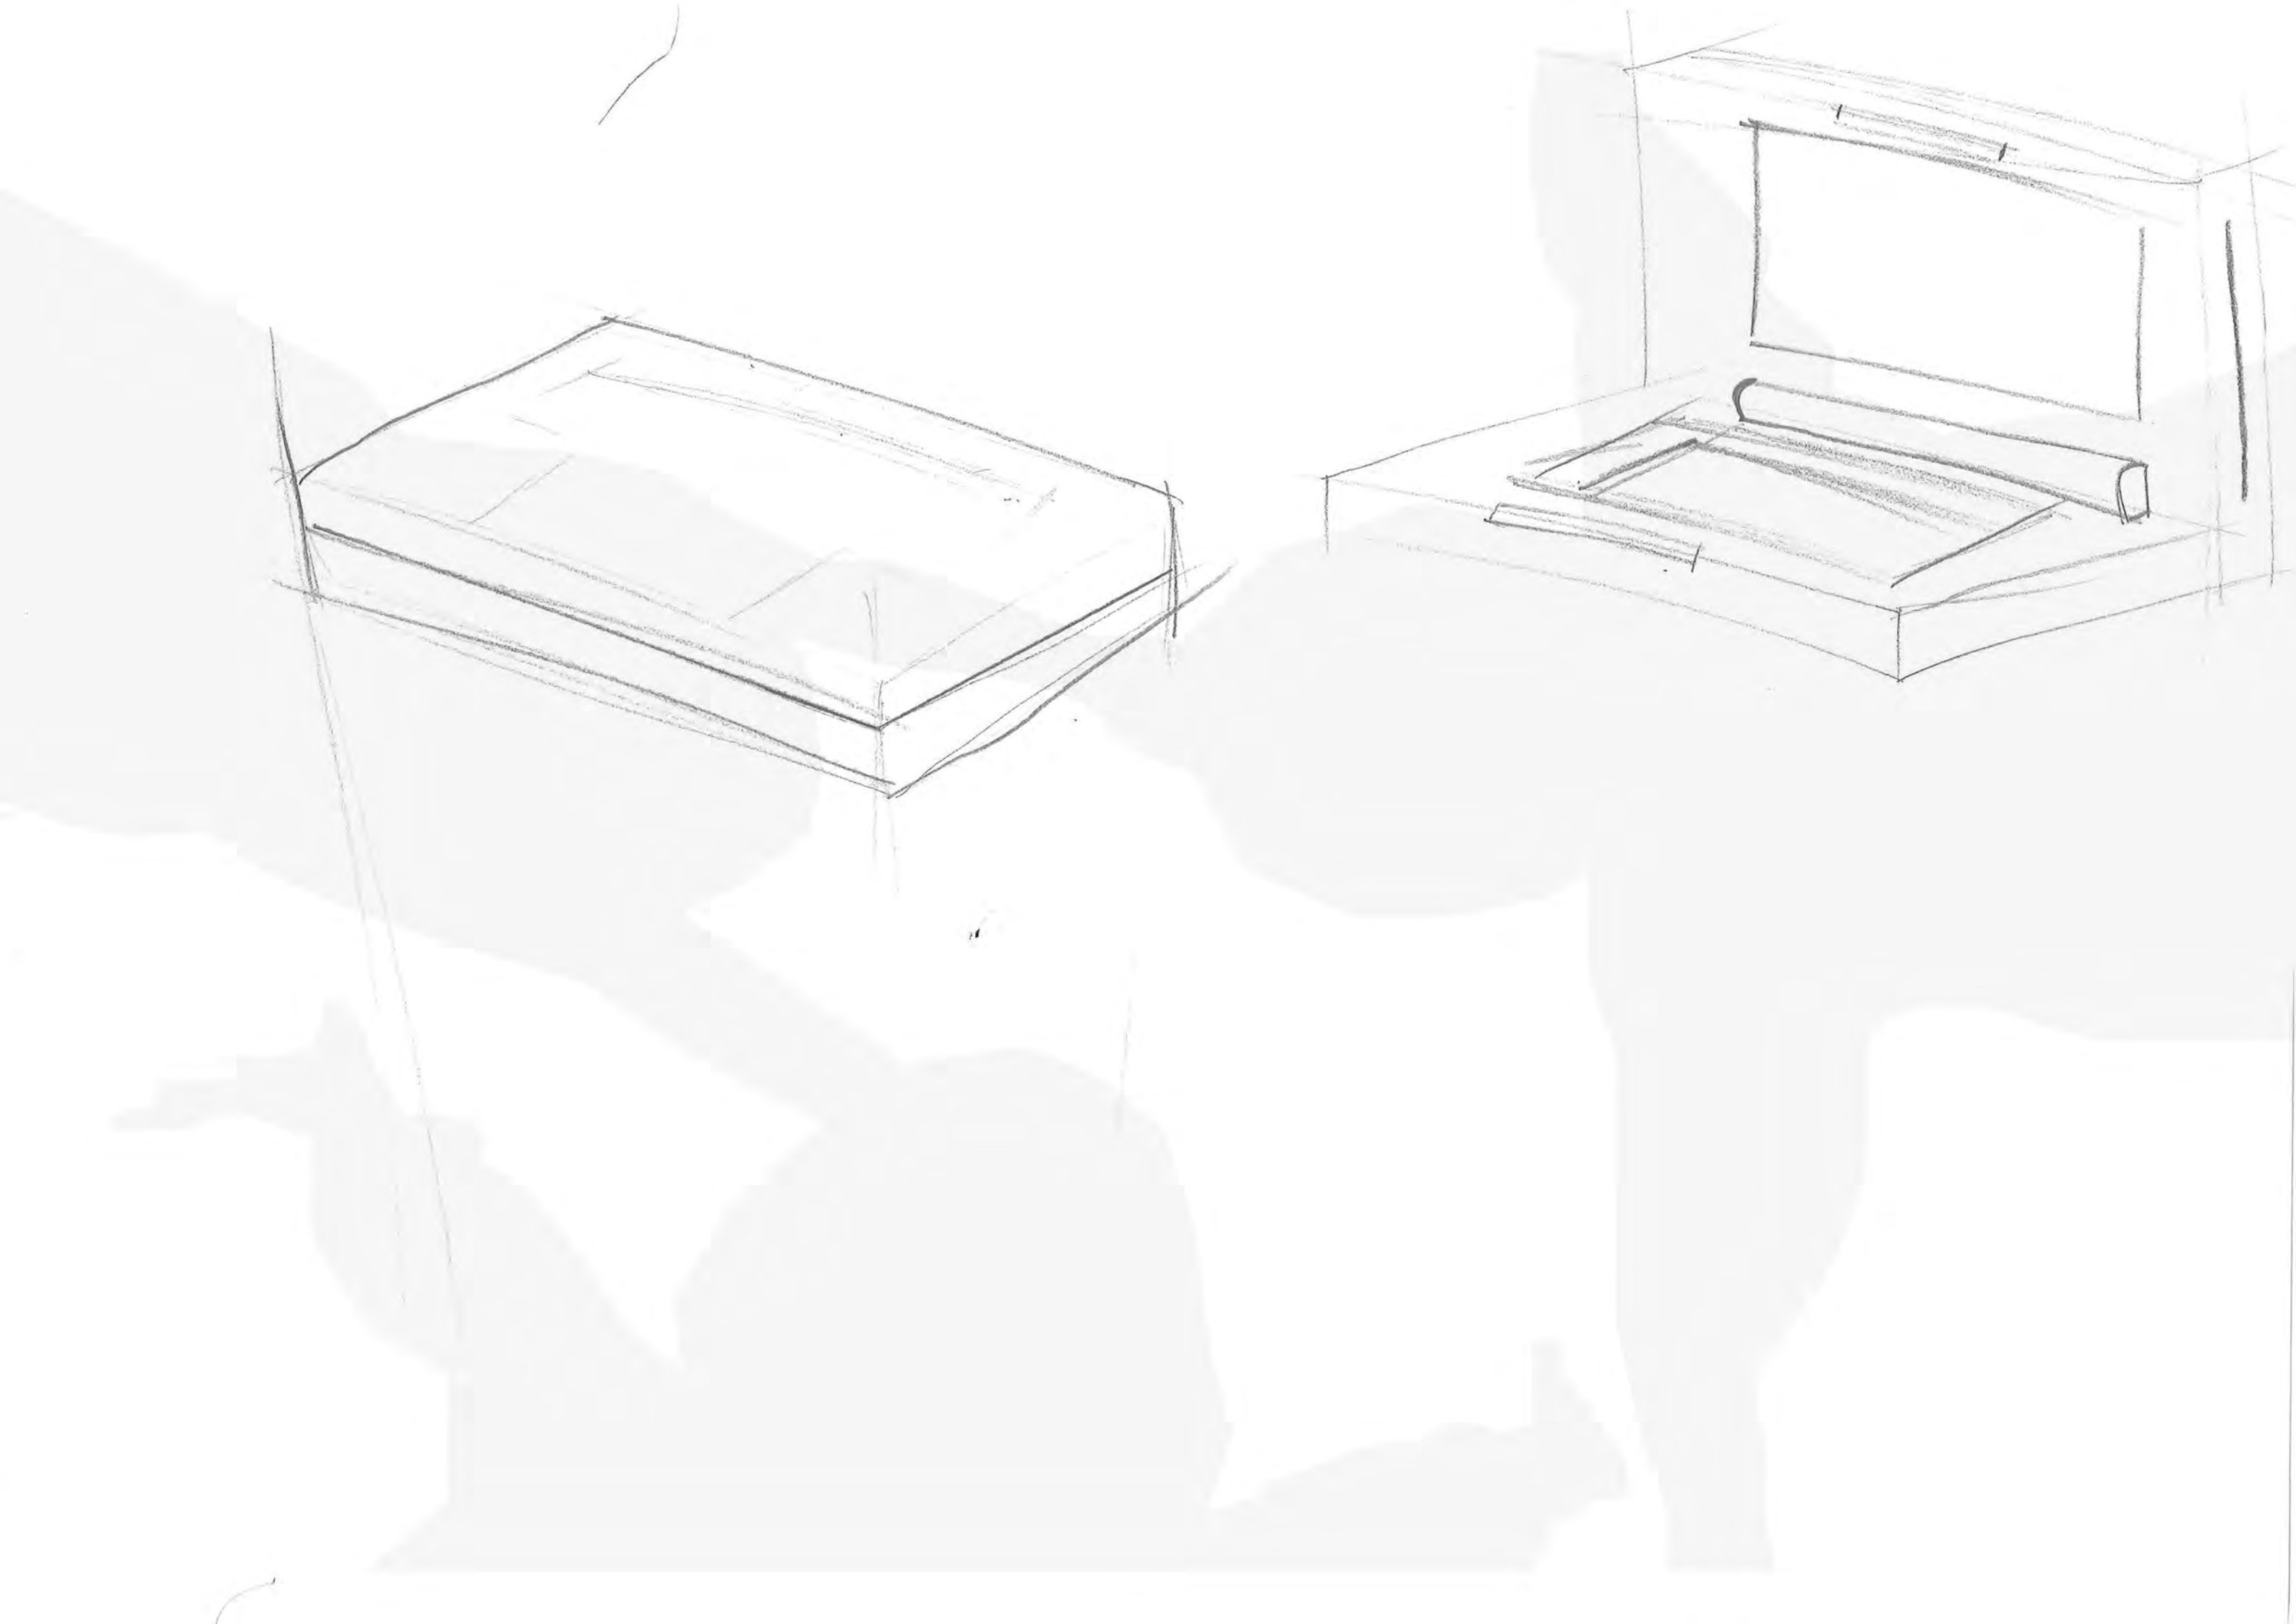

Observation Device

to enhance viewing

disk tray
like opening

acrylic sheet
with different magnifications
Button release

Insect design
 Smiling face
 will help attract
 the idea that
 insects can be
 fun to play with

Transparent back
 so captured insects
 can be viewed

legs like bulldog
 clips

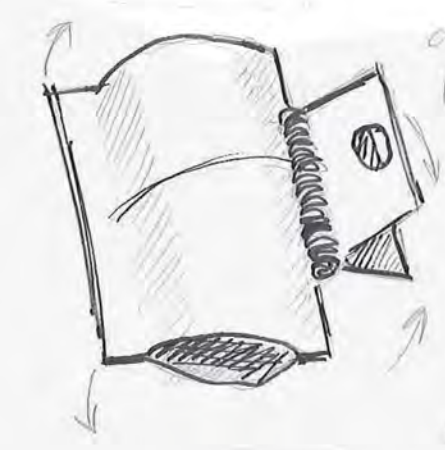

a track wide enough for
 common garden insects
 such as
 ants ladybugs
 wasps

soft
 gripping
 material
 to help stick
 to branches like shoes

Shoe grip

Bulldog Clip

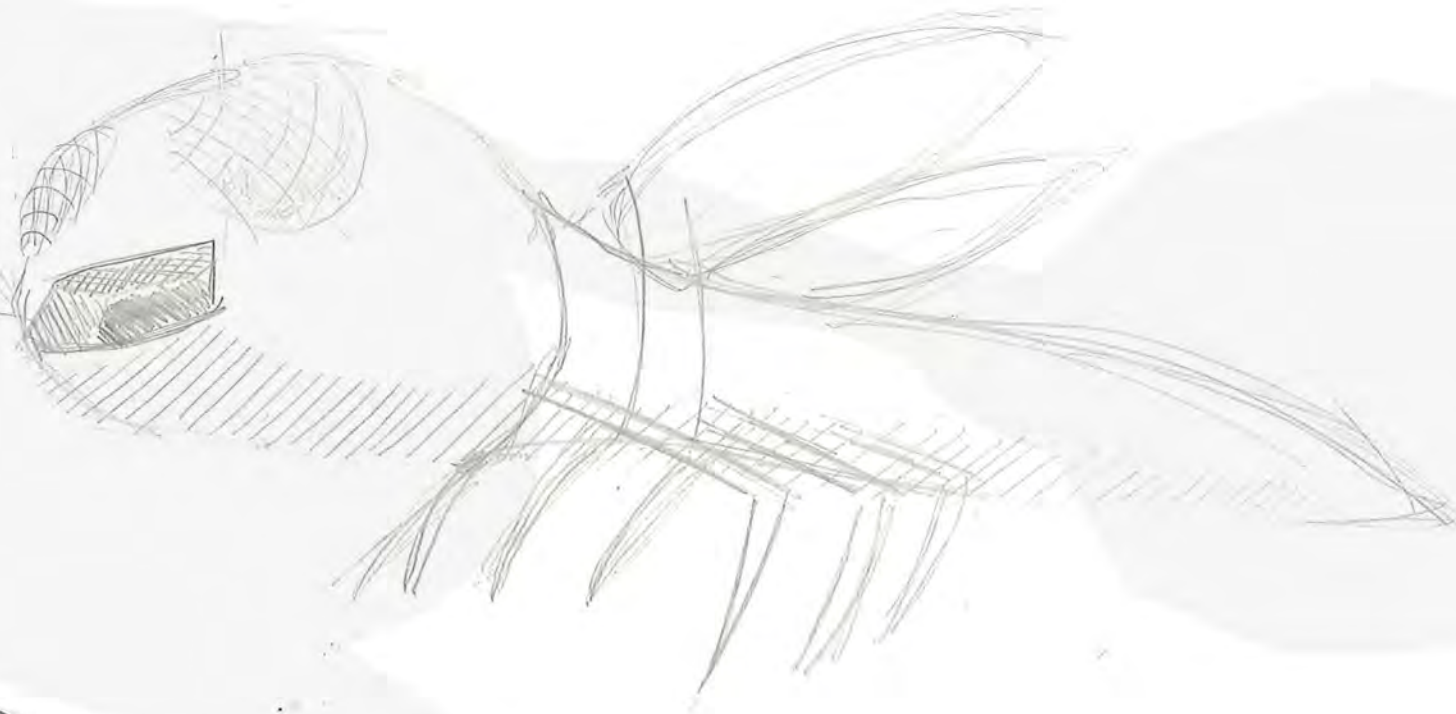

a mechanism
 like this
 will be useful
 for the insect
 catcher
 so it can
 attach to
 branches/
 trees

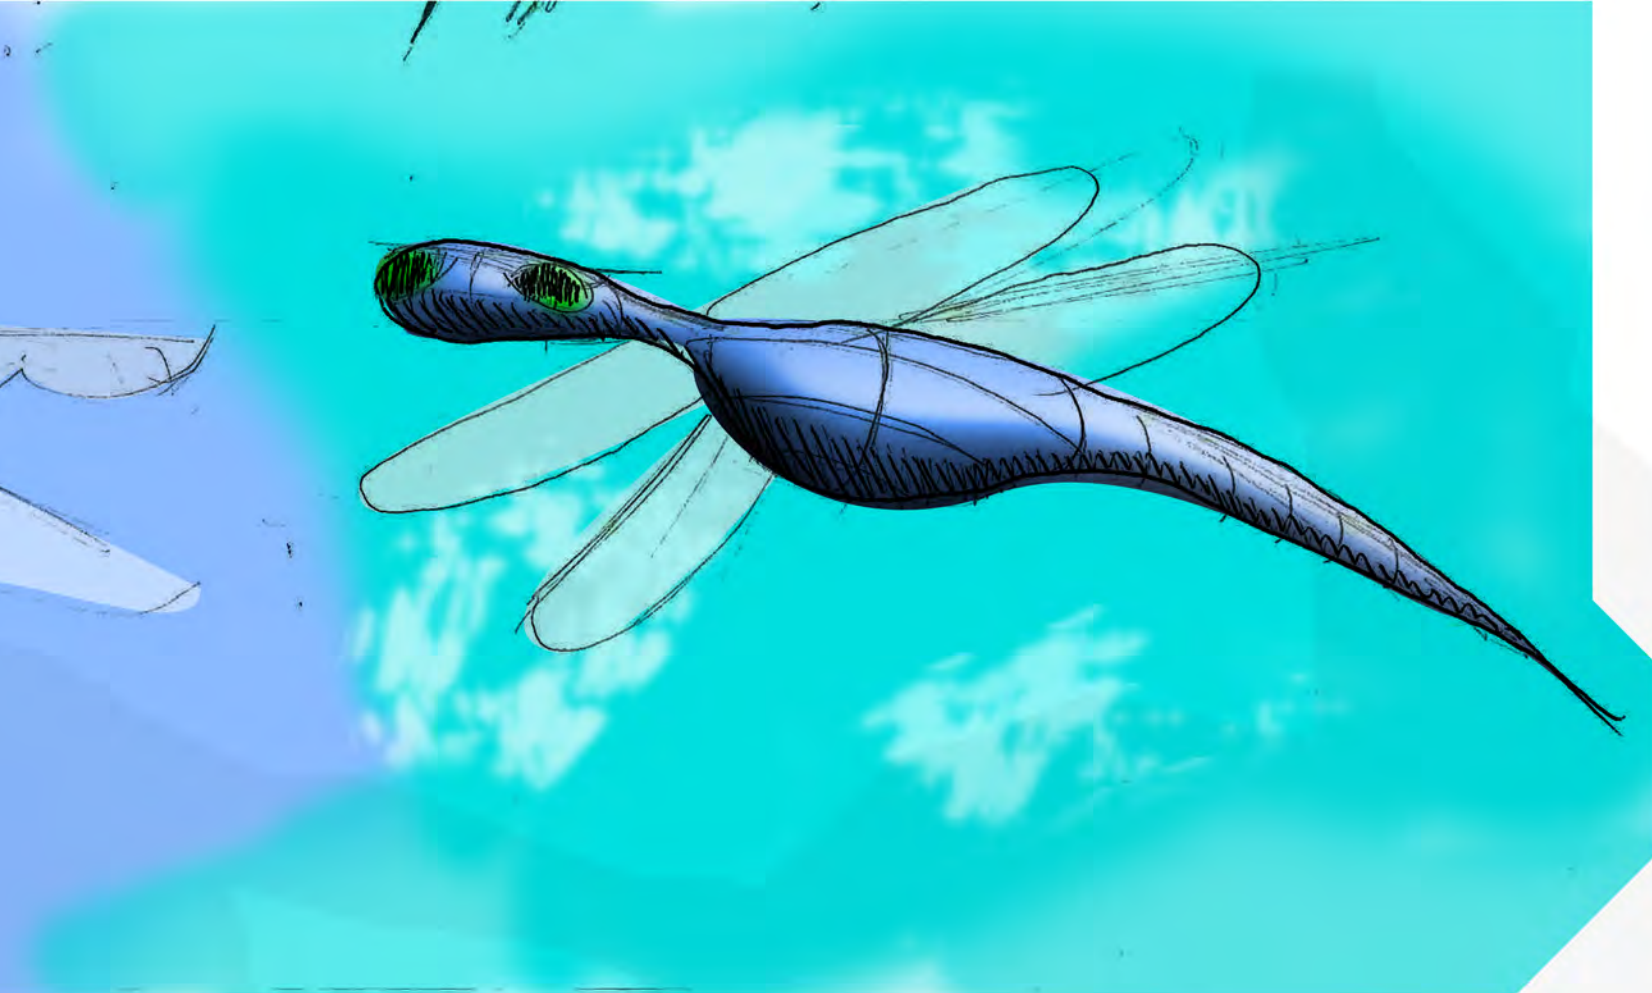

hanging on wires from tree or wall

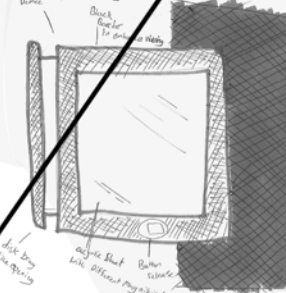

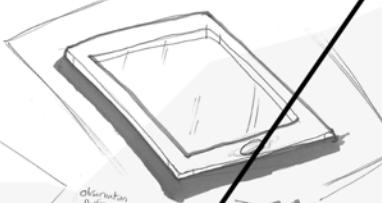

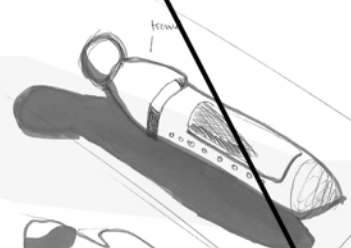

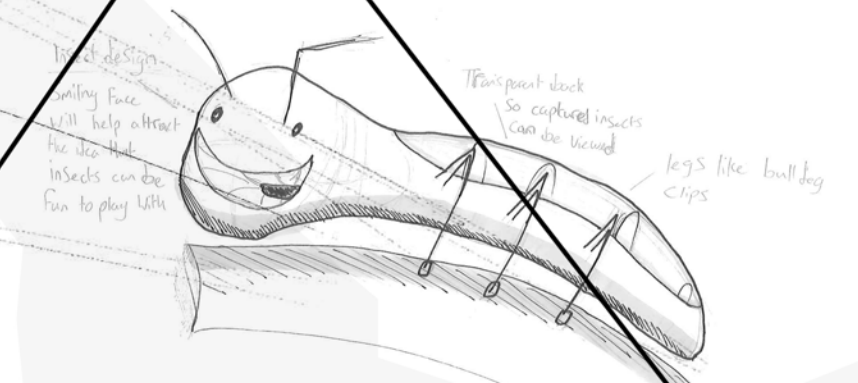

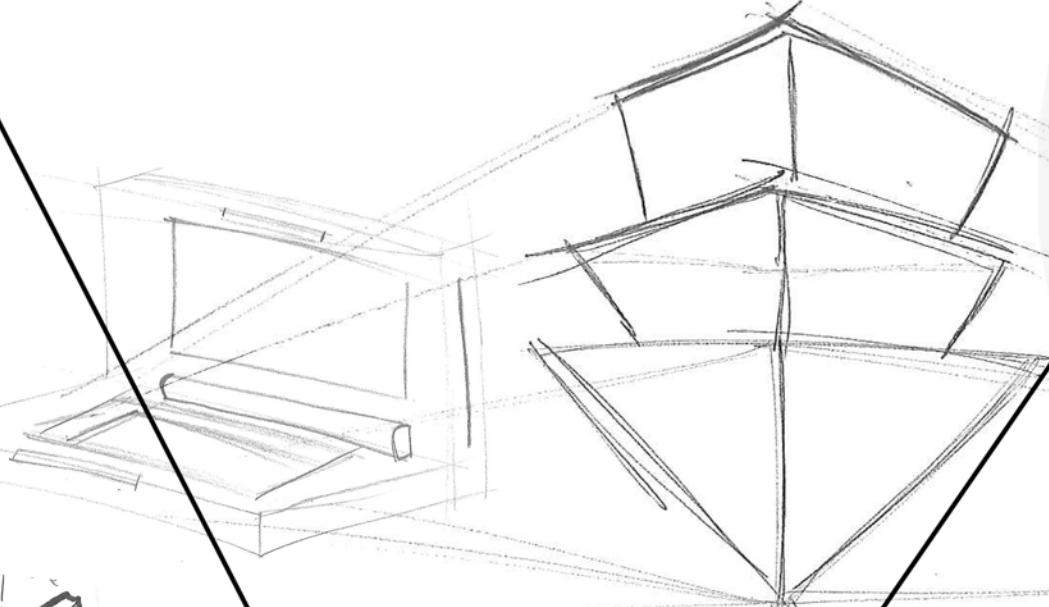

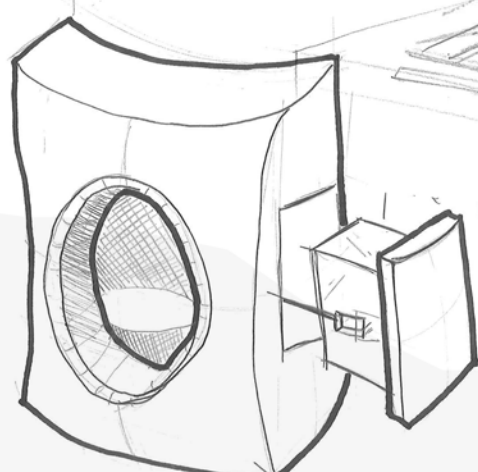

Mouth for catch insects

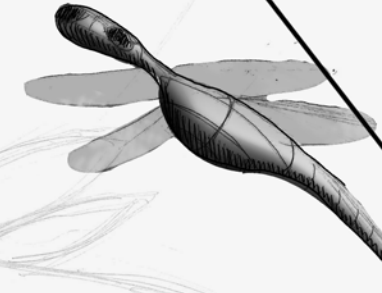

Insects bein' here

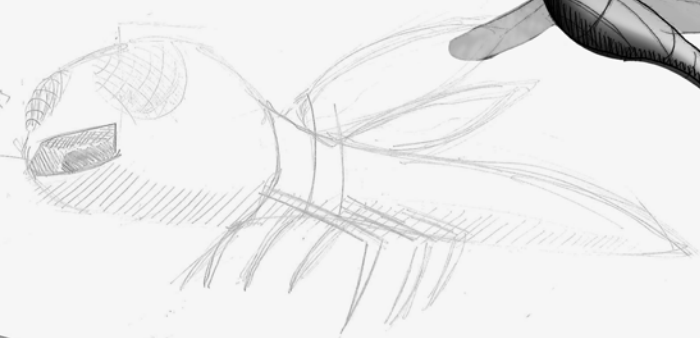

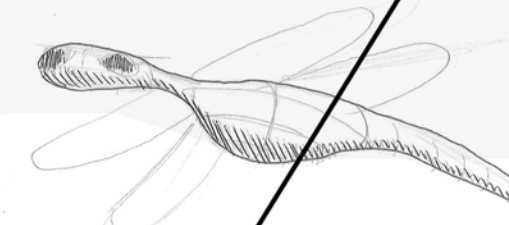

hanging on wires from the ceiling or wall

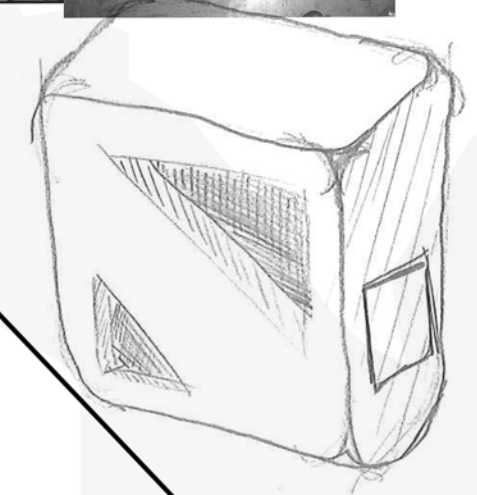

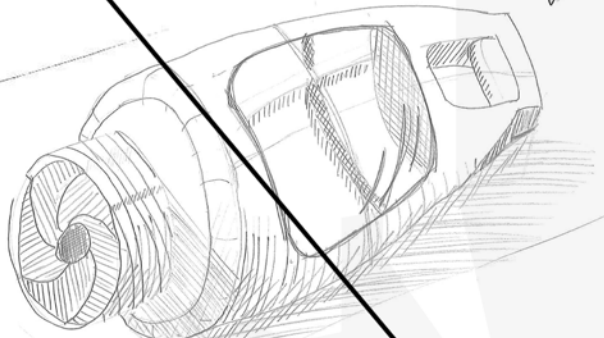

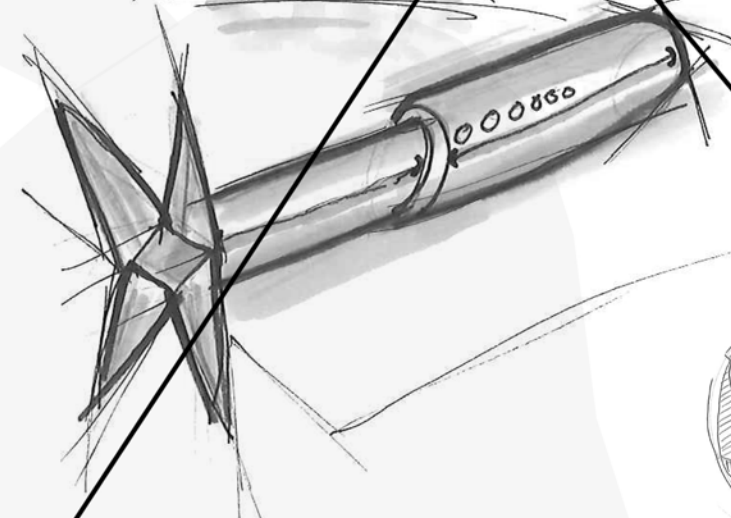

Mainly for growth caterpillars

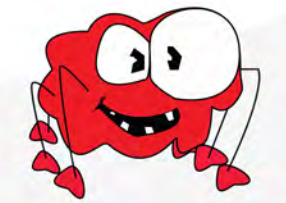

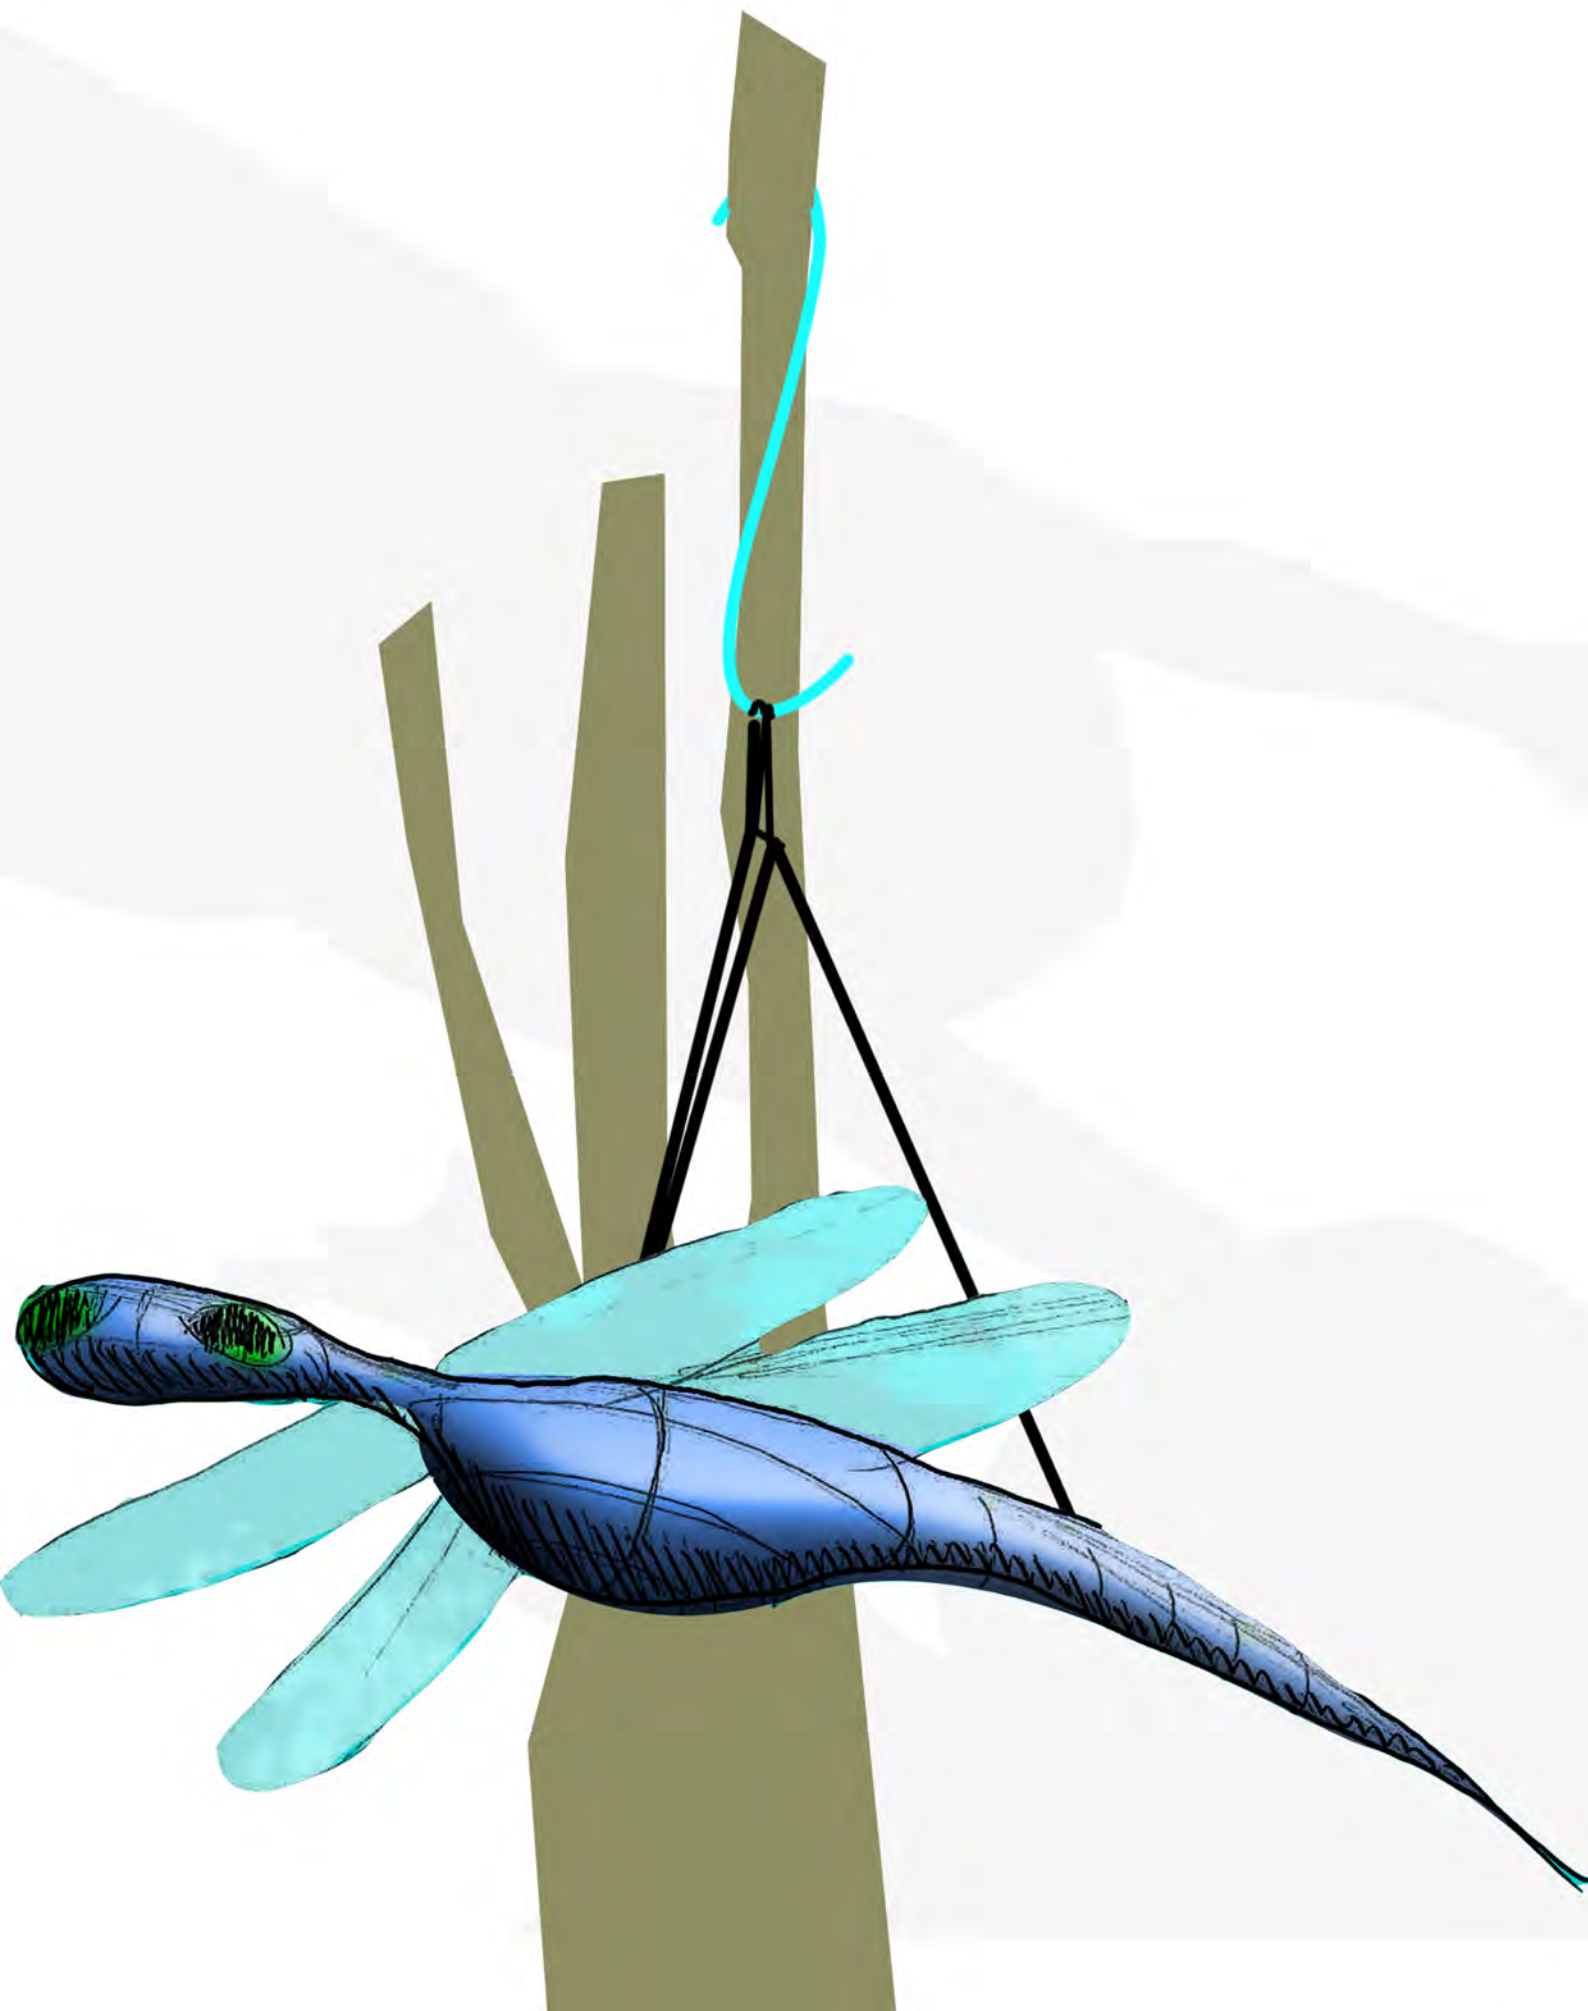

Insects would be here
